

THE IDEA

# We show the way – to the subject, the light and the people

We lead small photo journeys where two experienced photographers take travellers to the best subjects in the right light, and through local guides open doors to people and places they would otherwise never find.

For travellers with a passion for photography, at every level, who want to come home with images they are proud of and experience the destination for real.

Seeing a destination through the lens opens your senses and deepens every impression. You come closer to the culture and the people.
